*For Genealogy Lovers!*

Trace Your Roots With Your Micro And

Family Roots ™

THE lineage program from Quinsept.

The most comprehensive genealogy research program is available from Quinsept. With your micro, you can always have the most up-to-date information instantly available. **Family Roots** can also be used as a working tool in your research, serving many functions. There are six main capabilities in **Family Roots.**

1.Data Entry

Basic family information can be stored for each member, including user defined fields plus date & place of birth, death, address, parents, children, spouses and many others. You may make changes at any time in any place using a choice of formats. You are saved considerable work by automatic storage of information common to several people; ex: marriage date. Recording of sources and date of entry are also possible.

2.Charts

Three types of pedigree charts and a chart of descendants can be printed. Controls allow you to select the number of generations and what information is included for each person.

3.Sheets

All the information on one person can be printed in a single page format, or view the family with two types of the popular family group sheets. Trace an ancestral line on the screen by stepping from child to parent with a single keystroke, and more. Controls allow you to select formatting and information to include.

4.Lists

Alphabetized and numerically ordered list of names can be printed for as few or as many names as you want. Several options are provided.

5.Search

You can search through the basic family information stored in **Edit** finding whatever you request. Very general search criteria on several levels enable you to pinpoint family movements during certain time periods and locations, plus many other applications.

6.Histories

All versions have a method for storing histories, anecdotes and notes. Most versions allow direct use of files by your word processor. Storage of this type of information is unlimited.

Utilities

Utilities generate address lists, reassign person ID numbers, print blank charts, exchange data with other **Family Root** users, and many other tasks. More are being added periodically.

Requirements

System	Memory	DOS
APPLE* II⁺, IIe, or IIc	64K	3.3
APPLE* IIe, IIc, or IIGS	128K	ProDOS
Macintosh*	512K	Finder
IBM** PC	128K	PC DOS 1.1 or later
KAYPRO, EPSON, etc.	64K	CP/M[1] 2.2
TRS-80[2] Model 4	64K	TRS DOS 6.0 or later
COMMODORE[3] 64	64K	1541 DRIVE
COMMODORE[3] 128	128K	1541;-71;-81 DRIVE

Family Roots is available for a wide variety of machines; please ask if yours isn't listed. All versions require a minimum of 1 disk drive. Up to 6 disk drives, a printer, a hard disk, and a clock are among the optional equipment supported. **Master Control** program supplied adapts **Family Roots** to your system and provides many settings to allow you to adjust the software to your own special needs.

Our lower priced genealogy software **Lineages** (Apple and Commodore only) will get you started and can be upgraded later to **Family Roots.**

Family Roots for other computers is now under development.

Our genealogy software carries a 60-day unconditional money-back guarantee.

Most Commonly Asked Questions

1. How many people can I store information for?
All versions of Family Roots support at least one million people. If you use floppy disks, you may cross reference between disks.

2. Why do I need Family Roots if I have good word processing and data base programs?
Family Roots is a data base program created and modified for the special uses of genealogists. A word processing program can interact with Family Roots.

3. Can I use 3.5" microdisks?
Yes, for Prodos, IBM, Mac, and C128.

4. Can I use a hard disk? *Yes.*

5. What limits are there on name and field lengths or number of names or marriages, etc.? *None at all.*

6. Will Family Roots support my printer?
*Yes. Printer controls and paper width can be specified.
Popular printers can be selected from a menu.*

7. Can I record alternate name spellings? *Yes.*

8. Can I keep track of sources? *Yes - footnotes are provided.*

9. Can I assign my own person ID's? *Yes.*

10. How can I be sure of having the most current version of the program?
Registered users are notified about our low-priced updates when they become available. There is also an active user group with their own newsletter.

11. Do you support electronic transfer of data?
Yes. Ask about our FAMILY MOVE, PAF AND BACK, and FAMILY CONNECTIONS programs.

12. What else do you have? *TREE CHARTS makes a special type of chart in addition to the many done by Family Roots. FAMILY CONNECTIONS makes ordered lists, calendars and more.*

13. How can I get information before I buy the program?
Our trial disk with tutorial manual is an excellent way to experience the programs. You may also order our excellent, low priced user manual, which describes the programs in minute detail.
